

### **FORM PR-02 ALTERNATIVE OPERATING SCENARIO**

---

Proposals for reasonably anticipated operating scenarios may be included in the permit application. Two primary guidelines provided for alternative operating scenarios follow:

First, any proposals for establishing alternative operating scenarios **MAY NOT** be a relaxation of any requirement in an existing permit, judicial consent decree, administrative order, or rule.

Second, the proposal must also include a statement that the source shall, contemporaneously with making a change from one operating scenario to another, record in a log at the permitted facility a record of the scenario under which it is operating.

Because the material submitted for this portion of the application is a **proposal** it is necessary that, with each affected section of the application, information on all operating scenarios be included. Material provided in the bulk of the application need not be duplicated for this part of the submission, but must be referenced by Form and page number IN THIS PROPOSAL if it is to be considered for this proposal.

In this section, attach all appropriate forms containing alternative modes of operation. Submit all information on the proposal with this form.

#### **Proposal contents:**

- 1) Submit a written summary of each operating scenario and the impact on emissions. Include a table of contents for all materials submitted in support of the proposal.
- 2) Clearly reference the location of any primary application material that would be relevant to the consideration of each scenario, particularly if that material is not attached to this form.
- 3) For each piece of equipment for which an alternative mode of operation is proposed submit a separate copy of any forms (marked "Alternative operating scenario # \_\_\_\_") to describe a different mode of operation (e.g. Part 1, Form 3.0). If parameters included in the proposal require a change in operation of any other pieces of equipment, include a separate form from Part 1 (e.g. CE-01, ME-01, etc.) to describe the change in operation from that reported in Part 1 submission.
- 4) Submit a separate copy of Part 2, Sections 2 & 3, for each piece of equipment and/or applicable requirement covered under the proposal for which any applicable requirement exists. Mark each form submitted as "Alternative operating scenario # \_\_\_\_."
